Emne: Re: Vesterbyt byttestationer projekt

Dear Katarina, Line and Sofie,

I hope you remember our email exchange from November 2016, it's a while ago, but I am still hoping for a byttestation in Islands Brygge! The exchange station in Vesterbro has recently been upgraded to a wonderful public cupboard (see image attached) and this can only mean that the evaluation you were awaiting has been positive. Could I please ask you again to look into the opportunity of having such a byttestation in Islands Brygge? For example on the green path between Artillerivej and Islands Brygge road, where many locals walk, as its nicely between the old and new part of the neighbourhood.

I would love to hear from you about this potential project, not only because I am passionate about the exchange economy, but also because this is so important for the environment and necessary in an affluent society.

best wishes,
Agnieszka Mlicka
